

Progress Report Template

Project Name	Exploratory – A web portal connecting research and researchers with similar interests.
Index No	170182X
Weekly Report No	II
Reporting period	08-04-2020 to 08-05-2020
Section 1: Activities and Progress	
1.1 Implementation/ development progress <ul style="list-style-type: none">• Project comments section implementation.• Collaborative whiteboard shares feature implementation. <i>`- This feature was planned to get a web plugin from a service provider. When started implementation I got to know that the users who use our application must have an account from the service provider's web site. Since it is not a good user experience, I decided to implement the feature by myself. After some investigation and with the help of our mentor I finally got a project, which has basic features of a real time whiteboard with MIT license. I made some modifications and added some new features.</i>	
1.2 Testing progress <ul style="list-style-type: none">• Jest has been chosen as the testing Technology	
1.3 Deviations from proposed architecture and design (if any) <ul style="list-style-type: none">• As I mentioned above whiteboard connection is not from a third-party company. It is implemented in a separate server, which does not affect the current architecture of the project.	
Section 2: Risks, Issues and Challenges	
<ul style="list-style-type: none">• Due to lack of time, the notification system will not be included in the final output. As it must implemented after the individual parts have integrated, we concluded that the feasibility of implementing is very low. Since I had to do another research on whiteboard facility, a lot of time was wasted.	
Section 3: Next Steps	
<ul style="list-style-type: none">• Do the testing and project integration.
